

Globalization

David Harvey - Geographer (Time-space compression)
Marshall McLuhan - Global village

various process - that are interconnected.
Eg. Globalisation of labour, food, culture etc.

Localization

Local in nature & can't be replicated.
An understanding which make process unique.

Eg. Rice plantation, Great Wall of China.

Debates of Globalization -

→ Concept of Nation State

Hyper-globalists - everything is shaped by global processes

Argon
Argon Akkadrai - In this world Nation state seems like
sovereign king monarch

~~Argon~~ Sustainable development goals - who creates this -

Skeptics - Globalization is not new.

Eg. even before globalization, people were interconnected
cultural exchanges also was there previously.
Acculturation was present previously
Just the pace is ~~fast~~ fast.

Transformalists - both global & local plays a role.

Saskia Sassen - All these HQ are localised so we can't say
everything is ~~very~~ global.

→ At certain circumstances Global forces are important.

They talk about importance of scale (Geographical)

→ Macro → Meso → Micro
(with the state of country)

Things are at Macro scale - global forces are imp.
Nation State in such cases are not important.

Eg. International migration

At microstate - migration within the country.

↳ Nation State power increases.

Global-local Nexus / Glocalisation

↳ Recognition of ~~inter~~ interdependence b/w geographical scales.

Global trends influence local outcomes, but events in particular localities can also influence pattern

Dual movement of globalisation on one hand & localisation on the other.

Global → ← Local
Glocal

eg - Halloween celebrated in India

Globalisation - To earn profit

Two central Notions.

Globalization - increasing interconnectedness of world.

Glocalization - coupled processes of globalization & ~~glocal~~ localization

Change -

↳ in relation to a reference group.

Primitive Communism → Slavery → Feudalism → Capitalism
↳ Communism

Sanskritization -

M. N. Srinivas

Westernization

↓
Copying the west.

Modernization

↓
Islamisation
Tribalization

↓
copy the dominant people of society.

Change in structure -

A caste there used to be social sanctification -
Caste Now they have diluted a lot.

Power - to get work done.

westernization

NEP 2020

Factors leading to Globalization

- ↳ Revolution in information and communication technologies.
- ↳ Liberalisation of financial markets (India - 1990)
- ↳ International flows of commodities
- ↳ New international division of labour
- ↳ Global division of labour

① Global Division of Labour (GDL)

Subcontracting by firms from developed countries to developing countries.

Increasing levels of foreign Direct Investment (FDI) in developing countries.

Total of overseas business investments made by private companies → FDI

Actors involved in GDL -

1. Nations & State -

Liberalisation of economy.

Policy formulation

2. Transnational Companies (TNCs)

Companies with investments & activities that span international boundaries with subsidiary companies, factories, offices or facilities in several countries.

GDL in manufacturing sector.

Export Processing Zone (EPZ)

Special regions identified by governments & these regions are meant for companies producing products for export only.

Salvaged employees (semi skilled & skilled labour)

Small areas within which especially favourable investment & trading conditions are created by governments in order to attract export oriented industries.

Small shops

↓
low & wage

unskilled labour

Daily wage workers

They are not governed by any labour law. Work can also be illegal work for the export.

to Service Sector

Intangible Act.

Role of service sector in economic sector has been recently realised.

Adam Smith - viewed services as unproductive.

Theory of comparative ~~adv~~ advantages → given by Adam Smith.

Clark (1940) - need to address economics of tertiary industries.

→ service economy is equated with new type of society commonly called the post-industrial society.

→ defined as activities that relatively detached ~~fr~~ from material production & as a consequence do not ~~directly~~ directly involves the ~~process~~ processing of physical material.

service add value to something: either a good belonging to another person or to another person per se (eg - hair cut) (car repairs)

Communication services -

Emails, Tele Communication

- (1) Postal Services.
- (2) Courier Services.
- (3) Telecommunication
- (4) Film distribution
- (5) News & Press Agency, Library, Archive.

Business services -

Insurance services - are very popular

Transportation Services - Railway, sea, flight, metro.

Construction Services - Brokers, Architects, Civil Engineers.

Trade hotel restaurants & others
Health related services - Doctors, Chemists, Nurses,
Spa salon, cosmetic surgeon,
beauty product company.

Education services - Teaching, online classes, Publishers,
career counsellors, mock tests,

Personal services - Domestic helpers, gardeners, drivers,
private tuition, physiotherapist.

Recreational & Cultural Services - For
hockey & cycling services at park, amusement parks,
songs, movies, sports, video games,

Importance of Services Industry -

In recent years, services have become tradable.

Land, Labour, capital & other resources
for manufacturing sector requirements,
Now also required for service sector.

Factors influencing trade in services -

1. Information is raw material for knowledge."

→ Information Technology

→ Telecommunication revolution.

→ Transport - technology.

→ Government Influence - Rules & legislation made by government enables transportation & production of comp companies.

↳ Trading in china is difficult because of their government policies.

Globalisation of service industries -

• Technological developments have given a "foot loose" character, to service industries.

↓
To provide service from anywhere globally.

• with the advancement of technology and changes in government policies many parts of service sector have assumed a globalised character which might be called the globalisation of the service sector.

GDL in service sector -

→ global division of labour.

outsourcing - companies practice self contracting part of production process. typically most labour intensive & least skill intensive part - to firms in other countries with lower costs.

Developed countries outsource labours from developing countries. *

(Eg - ~~Amn~~)

Types of out-sourced services -

- ① Back office operations -
eg. call centres
- ② Medical transcription
- ~~③~~
- ④ Animations
- ⑤ Publication Activities
- ⑥ Online education - Mentors can be from anywhere
- ③ Legal transcription
Concord of Law
whatever lawyer
says & full process
is transcribed
(labour intensive job)

Characteristics of Labour in Outsourced industries -

- White collar workers.
- Educational Background. They should have minimum education level.
- ~~the~~ Urbanities - They need min amount of technological infrastructure.
- Non-unionised - Didn't encourage unionisation.

call centre - A physical location where calls are placed or received, in high volume for the purpose of sales, Telemarketing, Customer service, Technical support, specialised business (planning of trip, flight booking etc.)

(BPO)
Business Process Outsourcing.

→ Could be one/all

- Telemarketing centre

- Teleservicing centre

- Help desk

- Reservation centre for airlines or hotels.

- Catalogue retailer

Why outsourced to India -

→ Liberalisation of Indian Economy.

1. Partial Privatization of telecommunication.
2. Rapid industrialization & growth of IT parks in India.
3. Development of ~~IT~~ SEZ (tax benefit to IT companies)
Specialized Economic Zone

→ Low operating cost.

→ Cheap labour

→ Abundant English speaking population.

→ High Rate of unemployment.

→ Geographical Location (time zone)

Call centres as means of livelihood

→ Job creating industries,

more than 4000 outsourced call centres in India
more than 18 million people employed in ~~call~~
call centres (2016)

Large revenue to government - (₹133 billion
revenue 2014)

Characteristics of Call Centre Employees

Age group - 18 to 35 years.

Educational Qualification -

Completed undergraduate Degree OR currently
enrolled in it.

Socio Economic Background - ~~Urban~~ Urban, Middle ^{Class}

70% of employees are migrants.

First call centre - Wipro Gurgaon.

Factors causing social changes -

1. Advertisement for call centre jobs (^{catchy slogans} image of jobs - ~~ch~~)
2. Training processes
3. social atmosphere in the work place
4. Income

Tries to portray image of call centre ^{employees} ~~centre~~

- Urban youth
- Intelligent
- Outgoing
- Fashionable
- Fun loving
- Ready to be part of global youth culture.

Working conditions in the call centres -

- Odd working hours
- Western ambience ('bays' - ~~work~~ work stations)
- Area code
- Talk only in English. (Connect the location from where calls are answered)

Call centre training -

→ Alias Name
(Nickname)

Handita chatterjee } Name is significant identity marker for Indians unlike outside India.

- Brahmin
- Bengali
- Hindu
- Female

→ speaking with right accent-

MTC → mother ~~language~~ influence,
tongue

→ familiarisation with western culture.

western movies, sitcoms → gives a distorted idea.

Social Atmosphere at work.

→ working relationship (No stiff hierarchy amongst the employees)

→ Parties (Inhouse party)

Income

35 to 45K - min } disposable income
60-90K - max

high income compared
to the qualification

Do not lead / contribute
to family income.

Impacts of working in a call centre -

Economic → shopping, partying, clubbing, eating out
social → Changing social norms, Dating, Marriage, changing social relations 99%
health → Prospects

Shopping → Earlier they bought affordable clothes. But they later on started to going up market mall.

They indulge into online shopping.

Lot of income goes into paying credit card balance.

Party & Club - going to bars, night clubs

Employees start to believe they live in foreign countries & not follow such life style.

Home Bhabha - Third space (virtual space)

Employees start to live in virtual world.

Eating Out - Prefer to go cafes, western food etc.

Changing social Norms - the way of dressing.

Dating Pattern - speed dating and other dating thing not accepted in Indian culture.

Marriage, Respects - Divorce rates have increased over the time.

These things disturbs stability of society.

Changing social Relation - Increase of communication gap, Parents are not proud of their child's job. Job is not respectable.

Other social impacts -

↳ difficult to manage work-life balance.

(Relationship with family changes, can't get involved in many family functions)

↳ Changes relationship with the family.

(New Vocabulary, new accent)

Health impacts of call centre -

↳ high level of stress.

They are always trying to negotiate b/w actual & virtual identity. They need to be mentally very alert while talking to foreign customers.

Anne Housewife → Betty → emotional labour

Job requirements is very stressful.

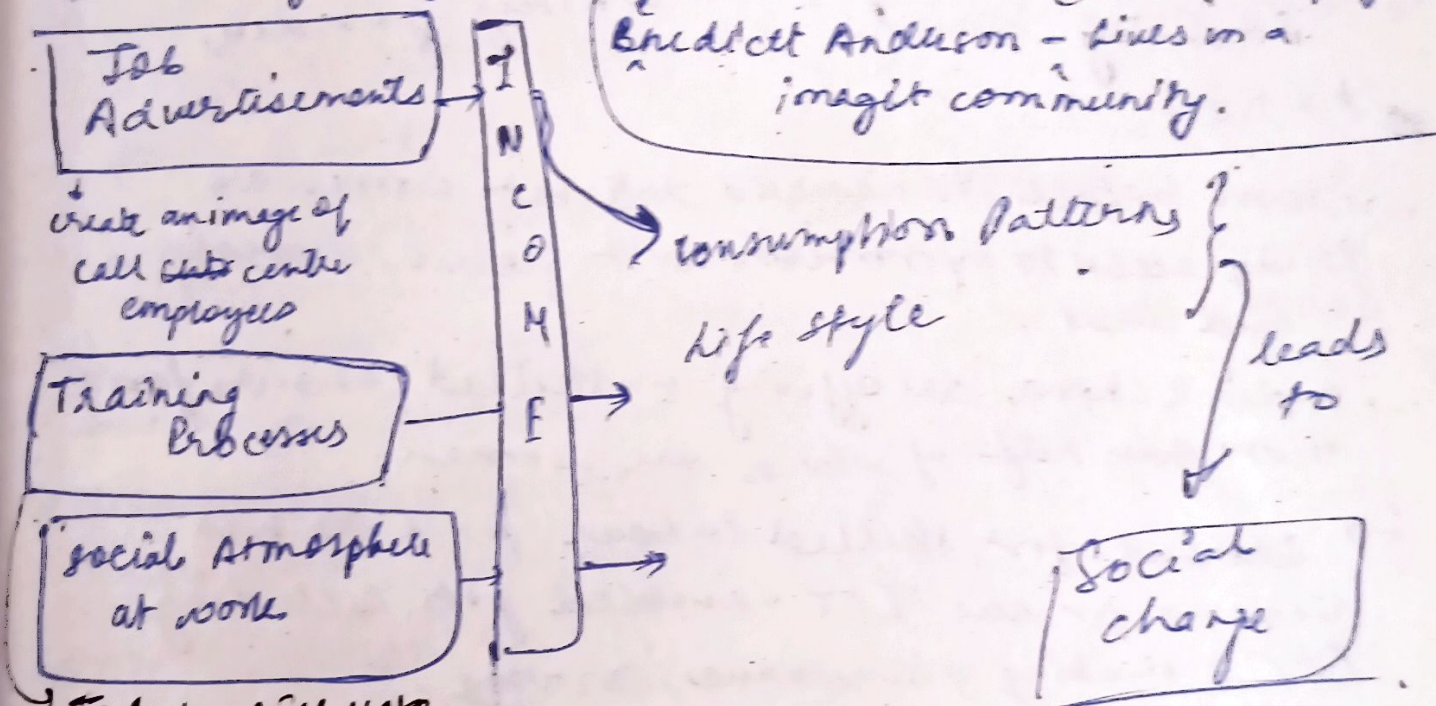

↳ Digestive problems - Body clock and kind of food employees are provided.

↳ sleeping disorder - Body is not getting required amount of ~~rest~~ rest.

↳ Addiction of caffeine, tobacco and alcohol.

BPO → KPO (Knowledge Process outsourcing)

concluding Thoughts -

Tools to live upto the created image.

economics changes fall short - as social & health changes have bigger impacts.

gender - social construction (Based on societal norms every gender has specific Role)

Sex - Biological differentiation.

How Globalisation has impacted gender?

→ Greater access to information has allowed people in developing countries to learn about LGBT issues and gender Inclusiveness.

→ Expansion of economic oppor opportunities for women due to ~~Ext~~ huge FDI in developing countries.

Third gender - criminal tribe (At the time of
Mughal Invasion
Britishers passed
this law

Nalson Judgement - Related
to Third Gender.

Gender acceptance of non-binary gender
Identity.

* FDI -

- From mobile phones and Internet women are
gaining access to information be it global, domestic
and local.
- India & China are offering unskilled labour for
more than half of which are women.
- Demand for skilled labour force too has
increased for new ICT-enabled jobs including
BPO, banking, insurance, printing, &
publishing: mainly taken up by women.

~~Coat of Many Colours~~

COAT OF MANY COUNTRIES.

Are women winner in globalisation -

- Feminization of labour force leading to
feminization of poverty.
- Gender division of labour at global level.
Empowerment - make informed choices &
power to implement it.

More hours of labour = wages are still low → leads to poverty

- deregulation in the conditions of work along with outsourcing & fragmentation of international supply chains has led to feminization of labour.
 - At present, women workers constitute about 4/5th of total call centre and BPO workforce in India.
 - women are considered as cheap labour & subjected to be employed in informal & unprotected forms of work.
 - wages & conditions of work in sweatshop
- Even in high paying STEM jobs, ~~even~~ women are being shortchanged.
- Women in engineering are paid only 82% of what male counter parts are paid. (2013)

GDL

- Allocation of diff jobs or types of work to people based on their gender.
- women tends to specialize more in unpaid work & men tend to specialize more in paid work due to patriarchy

In informal sector, women are bound to work at lower wages and in poor working condition at sweatshops & factories of different brand outlets as an outcome of globalization -

In service sector, women are under paid & have to face obstacles for getting promoted.

Positive aspects of globalization -

- Increased access to economic opportunities
- Trade openness & the spread of informations & communications techno technologies (ICTS)
- Introduction of outsourcing jobs in call centres BPOs for work force in developing countries.
- Feminization of Labour

Negative aspects of globalization -

- outsourcing cheaper labour becomes a trend, including majority of women labour,
- widening inequalities based on gender, income, race, religion & ~~ethnicity~~ ethnicity
- creation of sweatshops & SEZs to exploit cheap labour from developing countries.
- Degradation of values & disintegration of joint-families.
- health effects

GoI -

It is guided by gender stereotypes

Central feature of gender inequality

women constitutes highest lot of unpaid labours within household.

NGO Boom in India -

India has atleast 3.1 million NGOs.

→ More than double the number of schools in the country

→ 250X (No of govt hospitals)

→ one NGO for 700 people as against one policeman for 709 people.

→ There are 3366 NGOs working in Bihar,

UK, America, Germany → Provides lot of funding to NGOs.

NGOs and Globalisation of Development -

NGOs have specific location (not homogenous)

eg- in Bihar, most of the NGOs are located in Patliputra.

NGOs get lot of funding, but small amount reaches the needy.

Why location specific

- ↳ Project locations
- ↳ Ease accessibility (to the donors who contribute to NGOs)
- ↳ Influence of donors
- ↳ Powerful National Politicians

Areas of development covered by NGOs in Bihar

→ ~~Health~~ health, education, health & education
(22%) (14%) (21%)

→ generally directed by the donors.

Focus of NGOs is Public health and Education -

→ Maternal Health (ANC & Post Partum care)
(Institutional delivery) (Nutrition)

→ Child health (immunization, Nutrition)

→ Education

Security Lab

Various Interventions by NGOs -

→ verbal case reviews (VCR)

→ Kulkari/mobile Kurijs

→ Tools for assessing learning progress

Ground level Situation -

→ NGOs are more accountable to their donors than to their recipient communities

→ work in controlled environment -

→ NGOs create restricted development which are not ~~but~~ sustainable - If donor agency changes their focus & from education to animal protection all the developments done in dir of education are ended.

→ Reinforces inequality by obscuring social differences (unders existing social differences)

Gaps & lacunae -

→ developing tools that are socially & culturally unacceptable.

→ service users' perspective neglected.

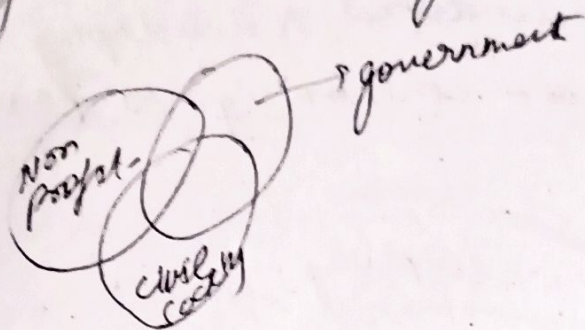

→ Excessive quantification - Policy can't be made based on these data.

→ Lack of Accountability.

→ Many ass vendors
Development Tourism.

WAY FORWARD

1. Accountability & Transparency

2. Evaluation - of work they are doing
(authenticity of info, Reports should be checked)

Development of under development-

→ Andre Gunder Frank

These NGOization leads to development of under development-

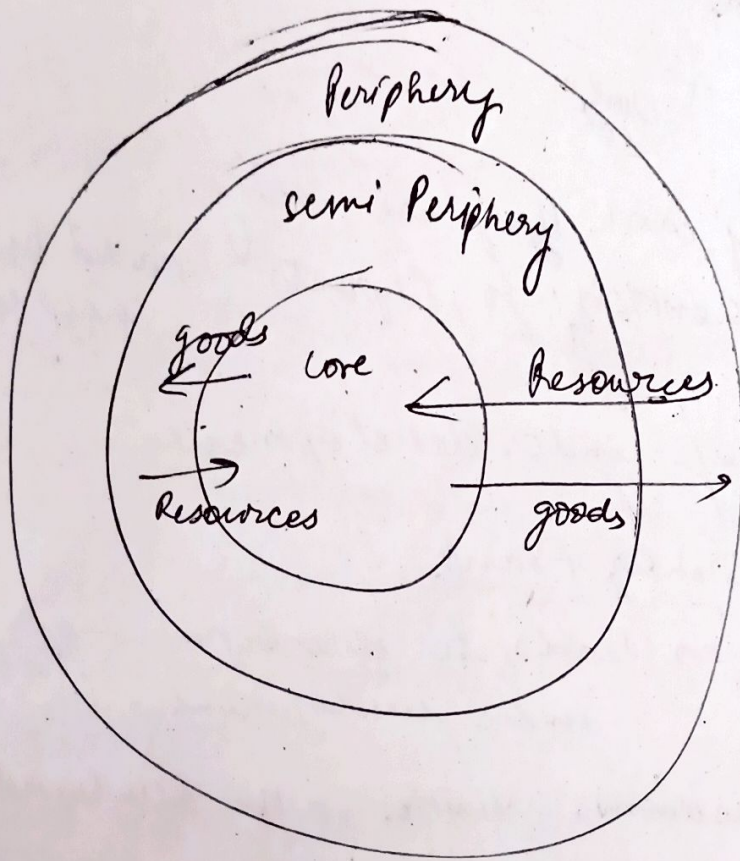

Frank posited that economic activities in the developed capitalist countries often lead to serious economic problem in the less developed countries. He argued that the world capitalist system is organized in such a way that the rich core countries develop at the expense of the poor peripheral countries.

Dependency Theory-

↳ is a way of understanding economic underdevelopment that looks at how poor countries are rich countries.

↳ Dependency theory focused on individual nations, their role as suppliers of raw material, cheap labor and

market- for expensive manufactured goods from industrialized countries. The unequal exchange relationship b/w developed & developing countries was viewed as ~~not~~ contributing to poor economic growth.

look a part

★

→ concept of social change

→ social change in India

→ Twin process of acculturation & deculturation.

look a part of existing culture

eg- way of dressing
(Acculturation)

→ Caste structure

social stratification

mobility within caste is possible for women

→ Sanskritization - (Term by M N Srinivasan)

To copy dominant people of society.

First wave of social change in India,
Over a period of time, with globalisation, reference group
changed from upper caste to western people.

Deepankar Gupta - Sociologist -

↳ says with westernization we actually become
west-toxicated $\rightarrow$ (westoxication)

Social Impact of Globalisation -

$\rightarrow$ has generated substantial employment in a number of
Asian countries.

$\rightarrow$ given rise to a new urban middle class,

$\downarrow$
outcome of employment generated bcoz
of globalization in Asian countries.

$\rightarrow$ defining the middle class has been problematic.

↳ has its own set of value system.

Both excess & lack of resources is seen in
upper & lower class respectively.

~~The~~ middle class is defined on basis of their status,
occupation & income.

Social Class -

What are resources: money, land, assets - distinction
made b/w wealth - monetary values of all own &
inc income - amount of money brought in through
wages, investments etc..

(Tangible & Intangible Assets)

What is power: ability to get work done, influence others & control their behaviour (+ve & -ve both)

Resources leads to a social phenomena in society → Power & Authority

What is authority: controls, particularly in the face of resistance, formal right to make decisions & command resources

Meaning	The ability or potential of an individual to influence others & control action	The legal & formal right to give orders & commands & take decision its known as authority
What is it?	It is personal trait	It is a formal right given to high officials
Source	Knowledge & experience expertise	Position & office
Hierarchy	Power does not follow any hierarchy	Authority follows the hierarchy
Resides with	Person	Designation
Legitimate	No	Yes

Social Class - A group of individuals who occupy a similar position in the economic system of production.

Types of Social Class -

- (1) Upper Class - Elite.
- (2) Upper Middle Class.
- (3) Lower Middle Class.
- (4) Working Class.
- (5) Poor - Earn less than ₹219 per day.

→ Karl Marx (1818-1883)

There were 2 great classes - the owners of the means of production (Capitalists) and the workers.

Have (bourgeois) and have nots (proletariate)

→ No of people for labour work (supply) was much greater than required labour (demand).
Karl Marx suggested they should bargain for their wages & control their birth rate.

→ Class divided based on money.

→ Max Weber (1864-1920)

→ Not who owns means of prod?

→ who has the purchasing capacity

→ Importance of market.

→ Technical division of labour (middle class)

Weber emphasised on importance of a person's purchasing power & introduced introduced third division of class - middle class.

New Middle Class -

who belong to this class?

- Originated in opposition to official Marxist theories
 - Gustav Schmoller (prior to 1933) coined the new term new middle class.
 - Salaried workers as members of new middle class.
 - Expansion of service sector (post-industrial period)
+
(white collar workers)
- Need to describe this new set of people with distinct professional characteristics.

- creation of post-industrial society.
- Transition from manufacturing to services
- Not mere occupational shift rather cultural differentiation b/w groups of people.
- Consumption is the channel that establishes various classes (Identity created by the pattern of things they consumed)

~~various All over~~

New Riche - New Rich

↑ (Acquired a new profession)

Disposable Money leads to more consumption in market.

NCAER - National Council for Applied Economics Research

- ① Upper class
- ② Consuming class
- ③ Climbers
- ④ Aspirants
- ⑤ Destitutes

Consuming Class can be termed as New middle class
in India.

Climbers - Lower middle class

Aspirants → have lower income than Climbers.

Destitutes → Below poverty line.

Is class & Caste inter-related -

Mukherjee - In India we have class in caste &
Caste in class.

Service sector jobs might be having majority people of upper
caste. Also lower caste people work in this
sector.

Not all upper caste people belong to upper class.
Similarly not all lower caste people belong to
lower class.

~~majority~~ The major function of country's economy is to
promote consumption -
New middle class are the new heroes of
consumer culture.

→ phenomenon most commonly seen in
globalised Asian countries.

Review

- Definition of globalization
- concept of time space compression (David Harvey)
- Examples of globalization → globalization of labour, food

- Definition of Localization
understanding of what makes certain place unique,
eg - ^{great} wall of China, rice transplantation in Vietnam.

- Debate of globalization

- ↳ Hyperglobalists
- ↳ Sceptics
- ↳ Transformationalists

- Importance of scales.

- Glocalization - global trends influence local outcomes, but events in particular localities can also influence patterns & trends elsewhere.

Global-local Nexus

Eg → food, fashion, language, culture

- Factors leading to globalization

- Division of Labour - Individual do what they are best at, this leads to increase in productivity.

Theory of comparative Advantage - (Adam Smith)

Principle whereby places & regions specialise in activities for which they have the greatest advantage in productivity relative to other regions or for which they are:

- GDP
- Actors involved in GDP
- GDP in Manufacturing sectors.
- Examples of EPZs → clothes, shoes, electronics.
- Examples of sweat shops → ornaments (manual labour)
- services - Activities that are relatively detached from material production & as a consequence do not directly involve the processing of physical materials -
- Service Industries
 - ↳ Highly sophisticated, knowledge & information intensive activities performed in both private & public sector
- Importance of Service Industry
- Services replaces goods manufacturing as the predominant production activities.
- growth of service industries → linked to level of economic development

→ factors influencing trade in services

Gender - socially constructed role, behaviours, activities & attributes that ~~are~~ given society considers appropriate for women & men.

→ Gender Role with Example - Nurse, Teacher, Pilot -
Women ↓ Men

→ Gender roles & economic Activities

→ Impacts of Globalisation on Gender

Development of under development -
